

Razor Wire or Barbed Tape is available in two profiles and three configurations to accommodate a diverse range of security requirements

PROFILES

Short Barb

Predominantly used for Commercial or industrial sites
Short Barb is a strong deterrent to unlawful access

Long Barb

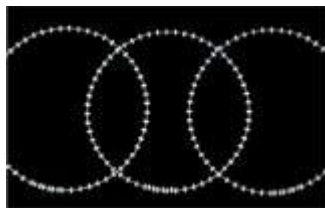

Predominantly used in high risk security situations such as prisons, military installations or high explosive storage depots. Long Barb is the ultimate in access prevention

CONFIGURATIONS:

Both Razor Wire profiles are available in three different configurations, Rings, Helical Coils or Clipped Concertina

Rings

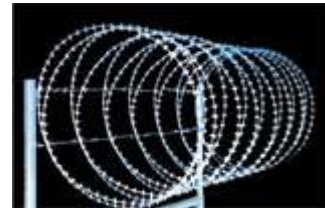

Rings are used on the top of gates, security fences or walls

Coils

Single Helical coils can be used on the top of walls, Fences and on roof-tops

Concertina

Clipped Concertina coils for high security situations
